EXPERIENCE

IBM

January 2021 – Present

UI/UX Designer · Data & AI

- Served as squad lead during an earlier product focus, triaging GitHub issues and backlog, running team mental-wellness check-ins, and leading sprint retros, which I continue to facilitate today.
- Recognized as **1 of 5 top design contributors** to the GA launch of watsonx.data, IBM's open data lakehouse, which generated **\$100M+ in revenue** within its first six months.
- As design lead for product-led growth on watsonx.data, **grew daily signups from single digits to sustained triple-digit volume** and **cut first-run provisioning from 15 minutes to 2** by redesigning the trial and onboarding experience.
- Led the design that enabled IBM's **first watsonx.data launch on Google Cloud Marketplace**, opening the product to a new customer channel.
- Designed Db2 Intelligence Center, an **AI-driven console taken from concept to GA**, reducing manual troubleshooting by giving database administrators self-service insights.
- Validated designs with real users through **biweekly research reviews with Db2's Technical Advisory Board** and represented design at two international IDUG user conferences, building a testable prototype in a week for on-site testing.
- Established **cross-product design consistency across the watsonx family**, aligning patterns so users moving between products encounter one coherent system.

RECOGNITION

Design Jam Global Winner (2021–2023) — Multiple top placements in IBM's global design competition: Best Overall & Most Viable (Sustainability, 2022, of 25 teams); Most Innovative & Most Entertaining (2021); Best Pitch (2021, of 22 teams).

Culture Catalyst Award (2023) — For curating the product and experience of watsonx.data.

Enterprise Design Thinking Co-Creator (2021) — Earned for exemplifying IBM's core design methodology.

EDUCATION

University of California, Berkeley
BA in Cognitive Science

SKILLS & TOOLS

Design Product-led growth · User research · Prototyping · Design QA · Cross-functional facilitation · Agile design

Tools Figma · Sketch · Adobe CC · Mural · Aha! · Monday · GitHub
